A GUIDE FOR THE PEOPLE WHO WRITE IT

When You See Me

Updating the website

Everything in this guide is done inside Sanity Studio, with a mouse and a keyboard. There is no code in it, no design terms, and nothing you are asked to understand about how the site is built. If a step in here does not match what is on your screen, stop and ask — that is always the right answer.

WHERE YOU GO

The Studio address is not in this copy yet

Ask whoever set the website up for the address of the Studio that belongs to this project, then rebuild the guide with it. Everything in here is done inside that address.

You will need an account on the project's Sanity workspace. If the link above does not open, or it asks you to sign in and you do not have a password, ask for one — nothing here works without it.

WRITTEN FOR	COVERS	EDITION
the When You See Me project	the eleven pages you can write in	3 November 2026

BEFORE ANYTHING ELSE

How the site is put together

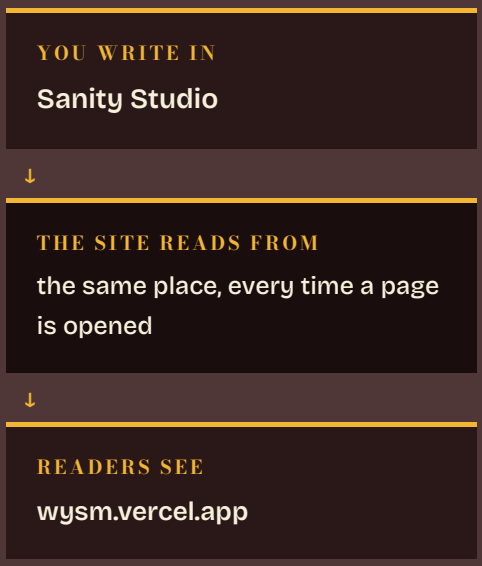

The website has two halves, and only one of them is yours to work in.

YOURS, IN SANITY STUDIO

The words and the photographs. Every publication in the list, every caption, every paragraph of introduction, the email address in the footer, the names of the funders. You change these, you press Publish, and the website changes.

NOT YOURS, WITH A DEVELOPER

Where things sit on the page, how large they are, the colours, the type, the photographs behind the words on the opening screen, and any page that does not exist yet. These live in code, and a small change in one place moves things on every screen.

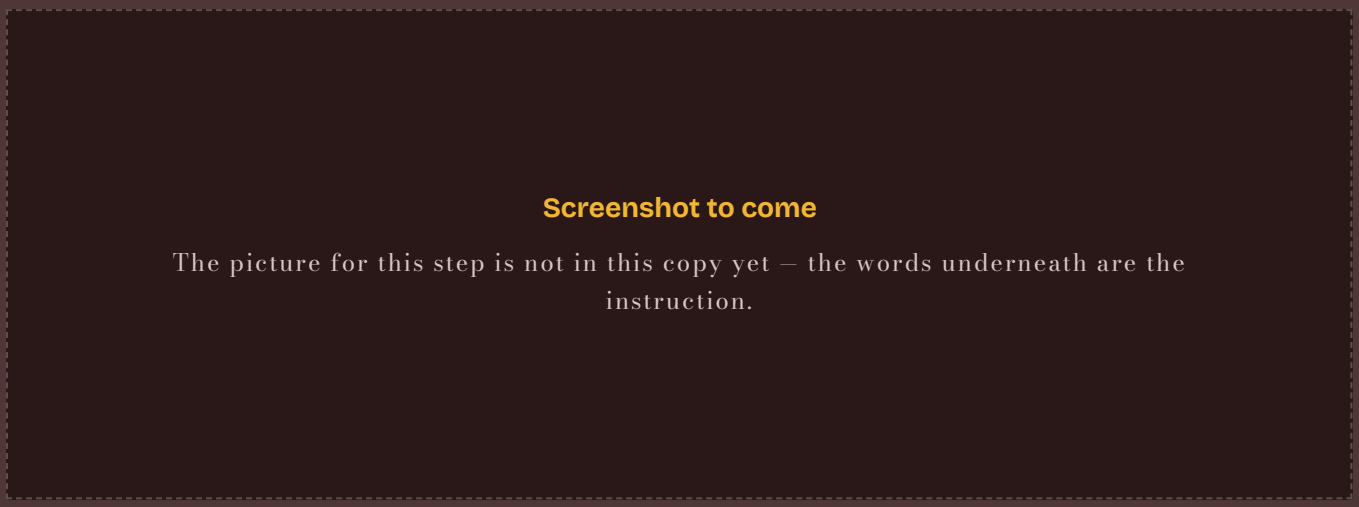

THE ONE THING WORTH KNOWING

Studio and the website are connected, but they are not the same thing. A few fields in Studio are there because the plan was for them to be used one day, and the website does not read them yet. Pages 11 and 12 list every one of them, so you never spend twenty minutes writing something that cannot arrive.

THE PAGE YOU ARE LOOKING AT	WHAT YOU ARE EDITING IN STUDIO
The opening sentence under the big photograph	**Home page** → Welcome statement
The list of everything published	**Publications** — one document per publication
The line under a page title	That page's **Standfirst** or **Summary**
Email, phone, funders, copyright line	**Site settings**
Press coverage links on About	**About page** → Media coverage

GETTING STARTED

Your first time in Studio

Studio asks for the workspace the moment you open the address.

1. **Open the address on the front page of this guide.** Studio loads in the browser like any other site. Nothing needs installing.
2. **Sign in** with the account on the project's workspace.
3. **Find the menu down the left.** It lists the pages by name, plus two things that are not pages: *Site settings* and *Creative work*.
4. **Click a name.** A list opens. Click one entry to open it, or the button at the top of the list to start a new one.

THE TWO BUTTONS, AND THE DIFFERENCE

Save draft keeps it for yourself. The website does not change and nobody else sees it. Use it whenever you are mid-sentence.

Publish puts it on the website. Within a minute or two, anyone opening the page sees your words.

There is no undo on Publish. Publish the fix and it is gone. That is normal, not a disaster.

FOUR HABITS THAT PREVENT EVERY ACCIDENT

Never delete an entry you did not create. Deleting a publication takes it off the site at once.

Change one thing, then publish. If six changed at once, you will not know which one broke.

Look at the site after you publish, with Shift held on the reload key, so it is not a cached copy.

If a field is greyed out or a button is missing, your account cannot see it. Ask whoever set you up; you are not doing it wrong.

REFERENCE

What you can change, page by page

The eleven documents in Studio, and exactly what each one puts on the website.

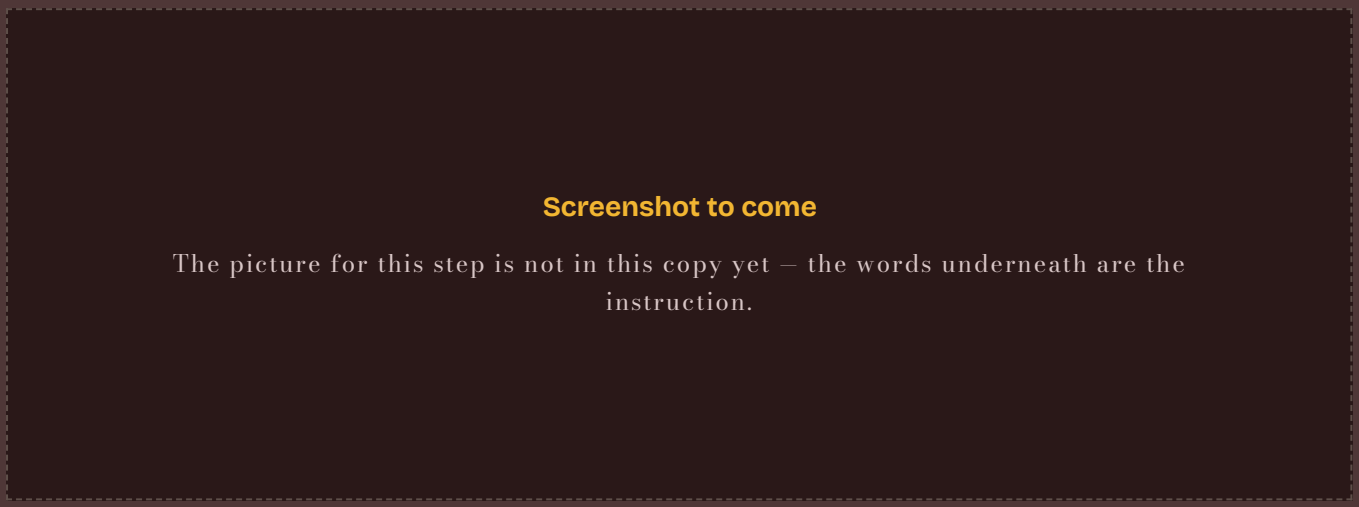

IN STUDIO	APPEARS ON	WHAT YOU CAN CHANGE
Home page	The opening page	Welcome statement. Search title and description.
About page	About	Media coverage: the outlet name and the link for each press item. Search title and description.
Publications page	Publications	The line under the title, the heading over the list, which publication is shown large at the top, search title and description.
Publication five exist	Publications, and each publication's own page	Everything about one publication: title, type, year, publisher, summary, citation, DOI, link, cover photograph.
Creative Works page	Creative Works	The line under the title, the introduction, the heading over the gallery, search title and description. **Read pages 11 and 12 first.**
Creative work	Search results	A work: format, title, date, where, a link, the description, the lead image, a gallery. **Read pages 11 and 12 first.**
Programs page	Programs	The line under the title, search title and description. **The three programme panels themselves are not here.**
Contact page	Contact	The line under the title, the wording beside the form, search title and description.
Site settings	Every page's footer	Email address, telephone number, the copyright name, the funders and their links, social account links.

The website's own navigation — About, Publications, Creative Works, Programs, Contact — is fixed, and there is no page you can add by yourself. A new page is a development job.

THE JOB YOU WILL DO MOST

Add a publication

Publications are the safest thing to add, because the list on the website is built from them.

One publication open in Studio, showing its fields.

FIELD	WHAT TO TYPE
Title	The full title as it should appear, with any subtitle after a colon.
Type (kind)	Journal article, Novel, Short story, Encyclopedia entry, Policy brief, Report.
Date (publishedAt)	The year, in the form the field asks for. It sets the order: newest first.
Publisher	Who published it. For a journal article, the journal's name.
Summary	Two to four sentences, shown before the reader opens it.
Citation	The reference exactly as it should be quoted, without a full stop at the end.
DOI	The full link, starting `https://doi.org/`. Leave empty if there is none.
Download link	Only if the PDF is already on the website. Ask for it to be put there first.
External link	Where to read or buy it, when there is no file to download.
Cover image	The cover, or the first page of the article. Then write the alt text (page 8).
Link (url)	**Leave exactly as it is.** It is the address of this publication's own page.

The one catch

A NEW PUBLICATION JOINS THE LIST. IT DOES NOT GET A PAGE.

Each publication's own page — the one that opens when a reader clicks it, with the cover, the abstract and the download button — is built separately from the list. Adding a sixth publication in Studio puts a sixth row on the Publications page, and that row will open a page that does not exist yet.

So: before you add a publication, ask for its page. Send the title, the abstract, the year and the cover, and say it is a new publication. The page is quick to make. Then the Link field in Studio gets filled in to point at it.

TO ADD ONE, ONCE THE PAGE EXISTS

1. Open **Publications** in the left-hand menu.
2. Click the button at the top of the list that starts a new entry.
3. Fill the fields from the previous page of this guide, top to bottom.
4. Paste the page address into **Link** when the developer gives it you.
5. Press **Publish**.
6. Open the Publications page on the website and check the new row is there, in the right year, with the right cover.

TO CHANGE WHICH PUBLICATION IS SHOWN LARGE AT THE TOP OF THE PAGE

Open **Publications page** (not an individual publication) and use the **Featured** picker. Leave it empty and the website shows the newest one by itself, which is the right answer nearly always.

TO CHANGE THE ORDER

The list sorts by date, newest first. Two publications in the same year appear in the order the project decided, which is held by the developer — tell them if you need that changed.

Change words on a page

1. Open the page's name in the left-hand menu.
2. Click into the field and make your change. Double-click a word to select it; three clicks take the whole sentence.
3. Press **Publish**.
4. Look at the website.

PARAGRAPHS

Studio's text fields are plain. To start a new paragraph, leave a **whole empty line** between the two. One line break is not a new paragraph — it just wraps.

COPYING IN FROM WORD OR A PDF

Paste, then look at what arrived. Invisible formatting travels with the text: curly quotation marks that print as odd characters, stray spaces, a bold you did not ask for. If the field has a button that says *clear formatting*, use it. Better still, paste into the field, then retype the two or three places it looks wrong.

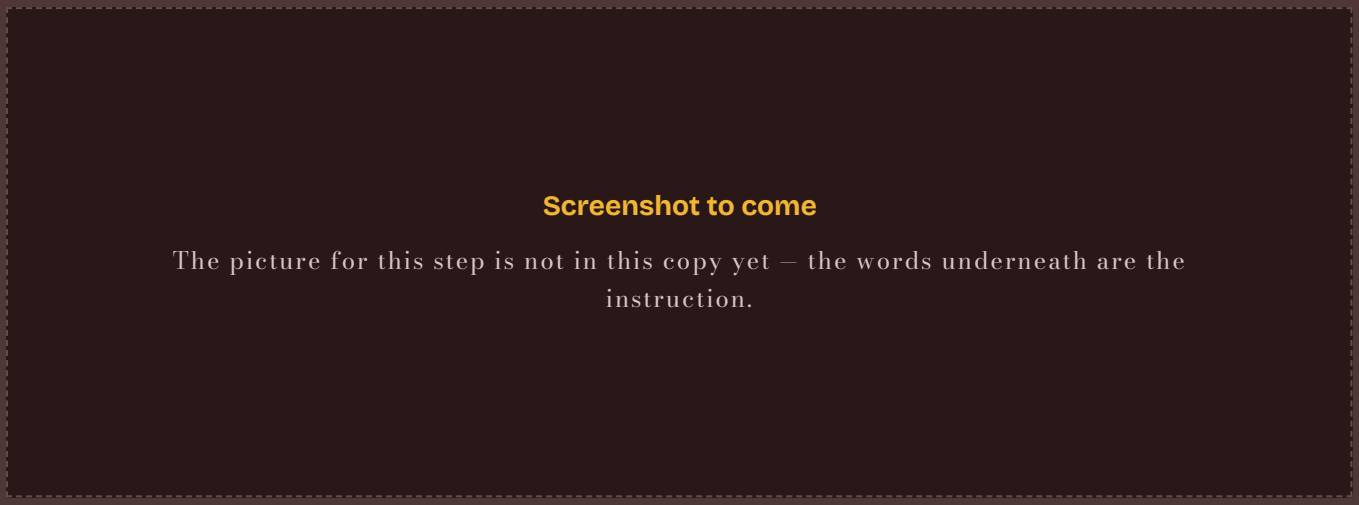

WHAT EACH FIELD ACTUALLY IS

Welcome statement	The sentence on the opening page, beside the line above it
Standfirst / Summary	The one line directly under a page's title
Introduction	The paragraph under that on Creative Works
List heading	The words over the list of publications
Gallery heading	The words over the photographs
Form prompt	The words beside the box on Contact

A field left empty does not break the page: the website falls back to the words written into it. That is why something you changed may look right in Studio and still show the old sentence — check you published the right field, then ask.

PHOTOGRAPHS

Change or add a photograph

An image field with the alt text written underneath it.

1. Click the image field. If one is already there, take it out first.
2. Drag the file in, or choose it from your computer.
3. When the upload finishes, a crop box appears. Drag it to frame the part that matters — the people, not the empty wall. Only move it if the default framing is wrong.
4. **Write the alt text.** This is not optional, and it is the part most people skip.
5. Publish, then look at the page.

ALT TEXT, IN ONE RULE

Say what is in the picture to someone who cannot see it, in one sentence, and do not write "photo of" or "image of".

No	Community theatre image.jpg
No	Women performing
Yes	Five performers in ankara cloth seated in a row on a stage before a red drape, one standing and gesturing, the audience's heads along the bottom of the frame.

If the photograph carries words that matter — a book cover, a banner — include them.

FILES

A photograph from a phone is fine. A very large file makes the page slow, and a very small one looks blurred. If you are asked to send the original, send the original.

TWO THINGS NOT TO DO

Do not add text into the photograph itself — captions belong in the words beside it, where they can be read by everyone and resized.

Do not put a photograph of a person's face where the website expects a document cover, or the other way round. The frame they go into is sized for one or the other.

SITE SETTINGS

The footer, the funders, the address

One document feeds the bottom of every page. Change it and the whole site changes at once.

Screenshot to come

The picture for this step is not in this copy yet — the words underneath are the instruction.

Site settings open, showing the contact fields and the list of funders.

FIELD	WHAT IT DOES	HOW TO WRITE IT
Contact email	In every page's footer	The address alone, nothing around it. `info@whenyouseeme.com`
Contact phone	The number in the footer	With the country code. `+233 457 9890`
Copyright holder	The bottom copyright line	The name only. The year writes itself.
Supporters	The funder plates	Full name and the link to it. Never an acronym on its own.
Social links	The footer's social column	Empty today. Leave it alone until the accounts exist.

ABOUT THE FUNDERS

Writing the funder out in full is the acknowledgement the research councils ask for; a logo is a courtesy, not a requirement, so **send a logo** rather than pasting a picture of one. There is no slot for a grant number in this list yet — if you have one that should appear, say so.

BEING FOUND

The search fields

Every page has a small section for search. Two lines do most of the work of how the project looks to someone who has never heard of it.

FIELD	WHERE IT SHOWS	WHAT TO WRITE
Title	The blue line in Google's results, and the name of the browser tab	Under about 60 characters. The page's subject first, the project's name last. Leave it empty to use what the page already says.
Description	The two lines under it	One or two sentences, under about 155 characters, that say what a reader will find. Write it for a person deciding whether to click.

THREE RULES

Do not leave a field half-filled. A title with the description still blank makes the page read worse than both being blank.

Do not stuff it with words. "Publications, gender-based violence, Ghana, research, theatre, short story, Medie" reads as noise to a person and to a search engine.

Never repeat the same description on two pages. Each page should say something different.

THE LIMIT, SO YOU ARE NOT SURPRISED

These fields reach Google and the browser tab. They do **not** reach the card that appears when a page is shared on WhatsApp, Facebook or LinkedIn. That card is written by the developer, page by page, and it shows the publication's own cover.

So if you change a description and the shared card still says the old thing, you have not done it wrong. Ask for the card to be updated to match.

ONE FIELD TO FIX RIGHT NOW

The Creative Works page's search description currently reads *"Applied theatre and illustrated stories made with migrant communities in Ghana..."*. The page itself, and the project's own brief, describe theatre, a short story and illustrated comics. The sentence should match. That is a two-minute change in the Creative Works page's search fields.

READ THIS BEFORE YOU SPEND TIME ON IT

Photographs and whole pages Studio cannot reach

These are real fields in Studio, or would be, and the website does not read them. Writing in them is not wrong — it just will not arrive. Each one says what to do instead.

IN STUDIO	WHY IT DOES NOT ARRIVE	WHAT TO DO INSTEAD
Home page → Hero image	The big opening image is served from the website's own files, so a Studio copy would arrive at a lower quality than the one on screen.	Ask. Send the replacement and it is put in properly.
Creative work the whole document	The Creative Works page is written out by hand, one work at a time. Studio holds one work today; the page shows the play, and the search page reads the rest.	Ask for the page to be connected. Until then, adding a work here will not put it on the page.
Creative Works page → Intro image	The image held in Studio is not the photograph the project chose for this page.	Ask for it to be replaced, or say which photograph should be there.
About page → press pictures and headlines	Studio holds the outlet's name and its link. The picture, the headline and the credit beside each one are chosen by the developer.	Add the name and the link, and mention what the row should show.

That is the whole list, across this page and the next: four things Studio cannot reach here, and four more on the next page. If something you changed has not arrived and it is not on either list, send the three things on page 13 — the address of the page, what you wrote in Studio, and what the website shows.

THE OTHER HALF OF THE SAME LIST

Words that are written into the page, not into a field

Some paragraphs look like they belong to a Studio field because a field with a similar name exists. They do not. These are the four to know about.

IN STUDIO	WHY IT DOES NOT ARRIVE	WHAT TO DO INSTEAD
Creative Works page → Strands	The three blocks under the introduction are written in the page. The Studio list still holds an item that was deliberately taken out.	Ask, and say which block you want changed.
Programs page → the three programme panels	Only the line under the title comes from Studio. The titles, dates, places and paragraphs of the three programmes are written in the page.	Send the new wording and say which programme it belongs to.
Publication → the abstract	There is no abstract field to write in yet. Each publication's page holds the abstract the project supplied.	Send the abstract text and ask for it to be put on the page.
Anything about layout	Size, position, colour, type, spacing, and which pages exist.	Always a developer conversation.

IF YOU ARE NOT SURE WHICH LIST SOMETHING IS ON

Write it, publish it, and look at the website. If nothing changed, it is on one of these two lists. Nothing is lost by trying: Studio keeps what you wrote, and it will arrive the day the page is connected to it.

TWO LAST THINGS

Keeping it right, and what to do when it is wrong

THE RULES, ALL OF THEM

Blank line	means a new paragraph
One link per field	paste the address alone, no words around it
Dates	in the form the field shows you, not typed as a sentence
Alt text	always, on every photograph
Funder names	in full, not abbreviated
Titles	as they should be read, not in capitals
Empty field	the page keeps its own words — never leave one half-written
Publish	one change at a time, then look

SOMETHING LOOKS WRONG ON THE SITE

1. **Reload with Shift held down.** The most common cause is a saved old copy of the page.
2. **Did you press Publish, not Save draft?** The button at the top tells you which state you are in.
3. **Is the field empty?** An empty field shows the page's own words, not a blank space.
4. **Is it on the page 11 or 12 list?** If so, it cannot arrive yet.
5. **Wait two minutes.** The site rebuilds itself after a publish.
6. **Still wrong?** Send three things: the page's address, a screenshot of what you wrote in Studio, and a screenshot of what the website shows. That is enough to find almost anything.

WHEN IN DOUBT

Stop and ask. Nothing in Studio is lost by waiting, and a question costs less than undoing something that has been published.

TEAR THIS OUT

One page, everything

TO CHANGE A PUBLICATION

Publications → pick it → fields top to bottom → Publish. A **new** one needs a page built first: ask.

TO CHANGE THE OPENING SENTENCE

Home page → Welcome statement → Publish.

TO CHANGE THE EMAIL OR PHONE

Site settings → Contact email or Contact phone → Publish. It changes on every page at once.

TO ADD A FUNDER

Site settings → Supporters → add one → full name and link → Publish.

TO ADD A PRESS LINK

About page → Media coverage → add one → outlet and link → Publish. The picture and headline need a developer.

ALWAYS

Blank line = new paragraph. Alt text on every image. One link per field. Publish one change at a time, then look at the site.

NEVER

Delete an entry you did not make. Paste formatted text without checking it. Write in a field on the pages 11 and 12 list and expect it to appear.

NEEDS A DEVELOPER

Anything about layout. New pages. The hero image. Programme panels. Publication abstracts. The Creative Works page. Shared-link cards. Social account addresses.

ASK

Ask your website developer

Their email address is put here when the guide is built. Until then, whoever gave you access to the Studio is the right person to ask.

The Studio address is written at the foot of this page.

THIS PROJECT'S STUDIO ADDRESS

WHO TO ASK, AND THEIR EMAIL
